User Manual

### Set up and Operation

1. Set your diffuser on a hard and level surface.
2. Connect the DC plug to the diffuser base.
3. Separate the main cover from the unit and fasten the water tank (Picture 1).
4. Fill the water tank with clean or purified water. DO NOT add more than 300ml to the water tank. (One measuring cup equals 160ML, plus 2 cups for 320ML) (Picture 2).
5. Do not use water or essential oils when the diffuser is operating.
6. Do not touch the top edge of the water tank and main cover. Do not touch the main cover when the unit is on. Also attach the main cover into the diffuser base.
7. Press and hold the power "Start" button on the diffuser to power on. This also activates automatic operation. (Picture 3)
8. When the diffuser is powered on, the timer will be set for 2 hours.
9. If "Start" is pressed a fourth time, the timer will shut off the diffuser after one hour of operation.
10. Pressing "Stop" will turn the diffuser off. This may also shut the power "Start" to shut off the diffuser.
11. When the diffuser gets powered on, the three LED lights will automatically change to different colors.
12. When the light is changed color, press the "STOP" button.
13. When the light is changed color, the diffuser will automatically stop working when water level is low.
14. When the light is changed color, the diffuser will automatically stop working when water level becomes too low. Always unplug the power supply before refilling the water tank.

### Maintaining Your Diffuser

General maintenance is recommended weekly to extend your diffuser's lifespan, and prevent bacteria growth in the water tank.

#### Cleaning

- 1. Unplug the power cable from the unit.
- 2. Rinse the water reservoir with fresh water mixed with white vinegar.
- 3. Use a soft, damp cloth to wipe thoroughly.
- 4. Repeat with the water tank cover.
- 5. DO NOT use alcohol, as it may damage the transducer.
- 6. DO NOT scrape or scratch the diffuser transducer.

#### Maintaining

- 1. Distilled or bottled water is recommended to prevent white mineral dust inside the water tank.
- 2. Please drain the water from the water tank when the diffuser is not in use for a long period (not used for a long time).
- 3. DO NOT submerge the unit in water while in use or when the unit is not plugged in.
- 4. Clean and dry the diffuser before storing. Store it in a cool and dry place.
